Executive Summary: Ather EV Market Intelligence Dashboard Analysis

Source: Ather EV Market Intelligence dataset, 100,000 records, January 2023 to September 2026. The dataset is synthetic and for educational use.

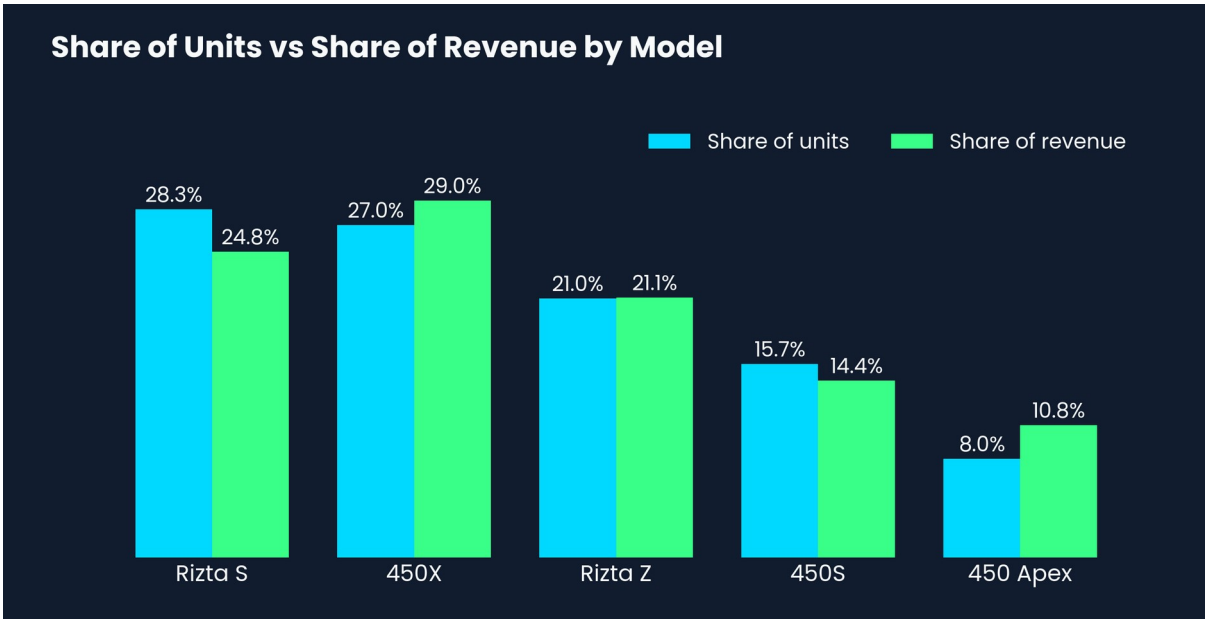

Overall Sales Performance

- **Total sales** amount to **299,661 scooters**, worth **₹4,183 Cr** at ex-showroom prices.
- The **average ex-showroom price** is **₹1,39,585** and the **average certified range** is **112 km**.
- The brand holds a **solid average rating of 4.24 / 5**, and **31.7%** of records are rated 4.5 or higher.
- Sales span **5 models**, **18 cities** and **12 states**.

Model Performance

- **Ather Rizta S** leads with **84,726 units (28.3%)**, followed by **450X** with 80,841 units (27.0%) and **Rizta Z** with 62,974 units (21.0%).
- **450X earns the most revenue**: **₹1,212 Cr (29.0%)**, helped by an average price of ₹1,49,962.
- **450 Apex** is only 8.0% of units but **10.8% of revenue**, with the highest price (₹1,87,482) and longest range (129 km).

Observation: The Rizta family (S and Z) delivers 49.3% of units, while the 450X and 450 Apex earn more revenue than their unit share suggests.

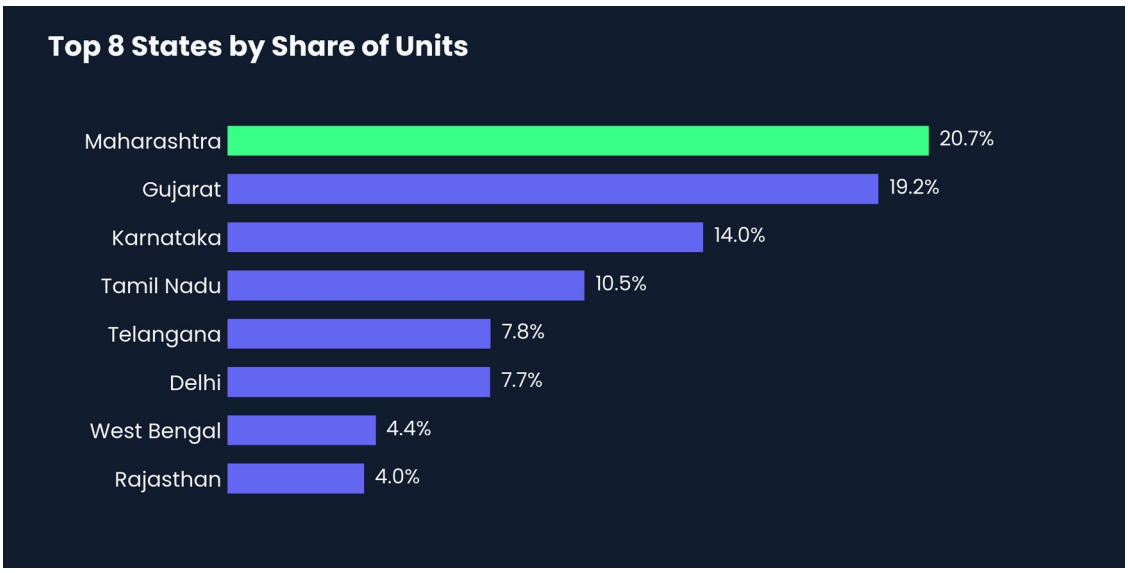

Improvement Opportunity:

- ❖ Promote the Rizta S as the entry model, since its price (₹1,22,500) gives the best price per km of range.
- ❖ Build upgrade offers from 450S and Rizta buyers to 450X and 450 Apex.
- ❖ Bundle accessories and extended warranties with the 450 Apex to raise value further.

Regional Performance

- **Bengaluru** leads with **33,559 units (11.2%)**, then **Ahmedabad** (30,562; 10.2%) and **Mumbai** (29,942; 10.0%).
- The top 3 states, **Maharashtra (20.7%)**, **Gujarat (19.2%)** and **Karnataka (14.0%)**, together hold **53.9%** of units.
- Smaller markets such as **Nagpur, Mysuru, Coimbatore, Lucknow, Indore and Chandigarh** each hold under 3% of units.

Observation: Sales are concentrated in a few metros and western and southern states, while many cities stay small.

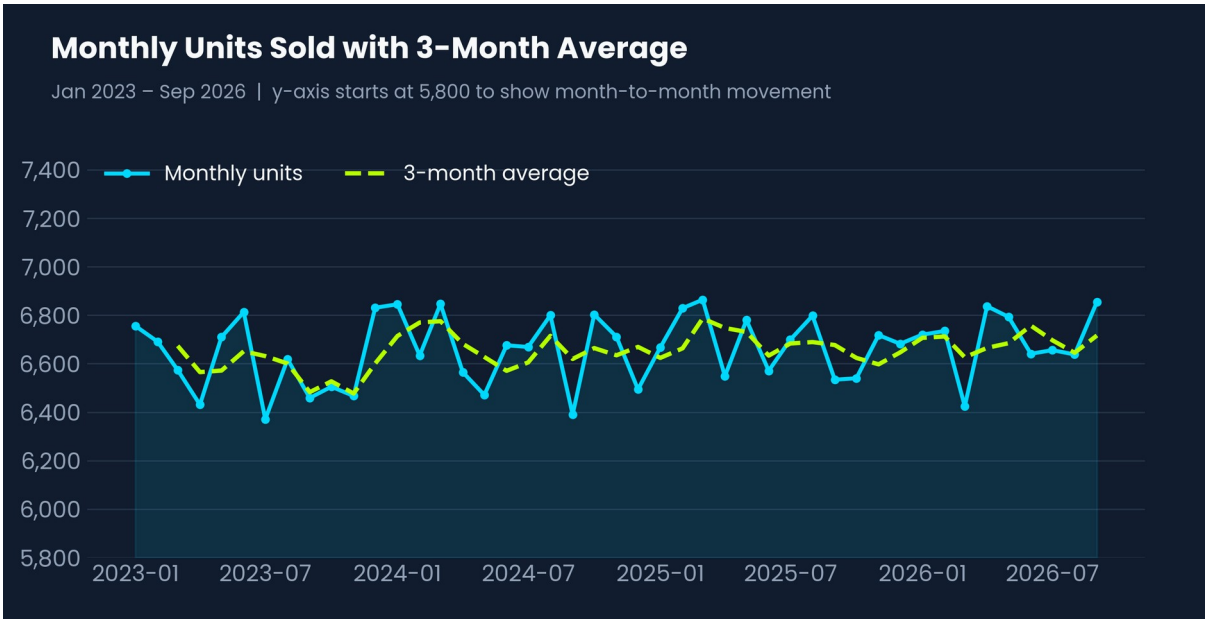

Improvement Opportunity:

- ❖ Open experience centres and run test-ride events in cities under 3% share.

- ❖ Use the same marketing playbook that works in Bengaluru and Ahmedabad for similar mid-sized cities.
- ❖ Track city-level share every quarter to spot markets that are ready to scale.

Sales Trend

- Quarterly sales stay between **19.4K and 20.4K units** from Q1 2023 to Q3 2026.
- Units sold from January to September were **59,423 (2023)**, **59,897 (2024)**, **60,291 (2025)** and **60,299 (2026)**, so 2026 is **+0.0%** against 2025.
- The best month was **March 2025 (6,864 units)** and the weakest was **July 2023 (6,371 units)**.

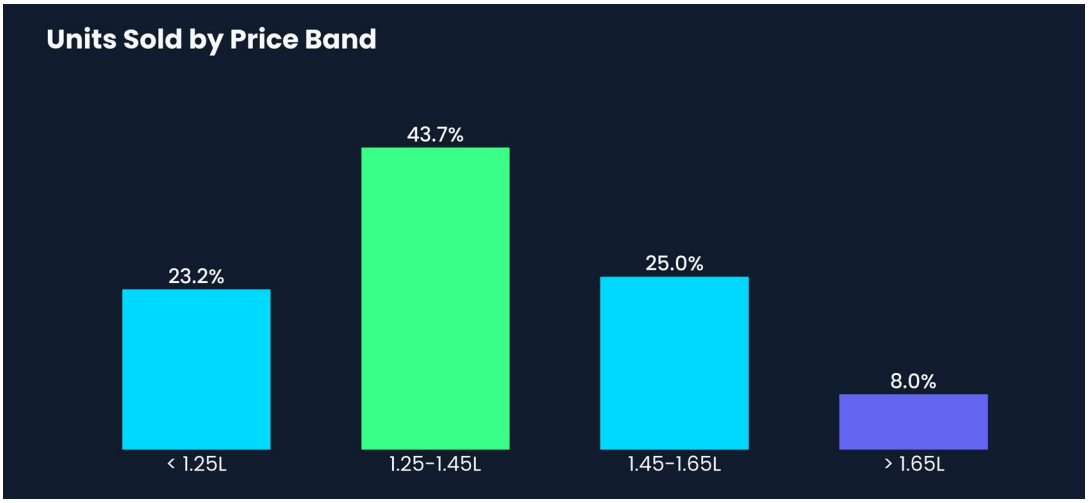

Observation: Sales have plateaued. Volume is stable, but growth has stopped.

Improvement Opportunity:

- ❖ Set a growth target for 2027 and tie it to new cities and a new model or variant.
- ❖ Run festival and season-based offers to lift the weaker months.
- ❖ Analyse why March 2025 peaked and repeat what worked.

Pricing and Battery Mix

- The **₹1.25L to ₹1.45L band** is the largest, with **43.7%** of units, followed by ₹1.45L to ₹1.65L (25.0%) and under ₹1.25L (23.2%).
- Only **8.0%** of units sell above ₹1.65L.
- The **2.9 kWh** battery accounts for **53.8%** of units and the **3.7 kWh** battery for 46.2%.

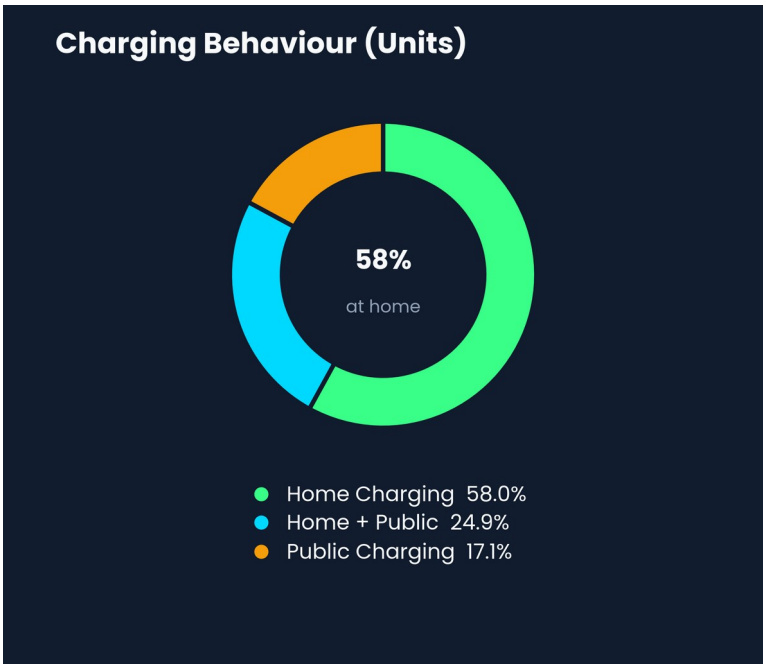

Observation: Buyers favour mid-priced scooters and the smaller battery, which keeps the price down.

Improvement Opportunity:

- ❖ Keep strong offers in the ₹1.25L to ₹1.45L band, where demand is highest.
- ❖ Offer easy financing and exchange schemes to move buyers from under ₹1.25L up to the next band.

Charging Behaviour

- **Home charging** is used for **58.0%** of units, **home plus public** for 24.9% and **public only** for 17.1%.
- About **42%** of buyers rely on public charging at least some of the time.
- The split is almost identical across all five models, from 57.4% to 58.2% home charging.

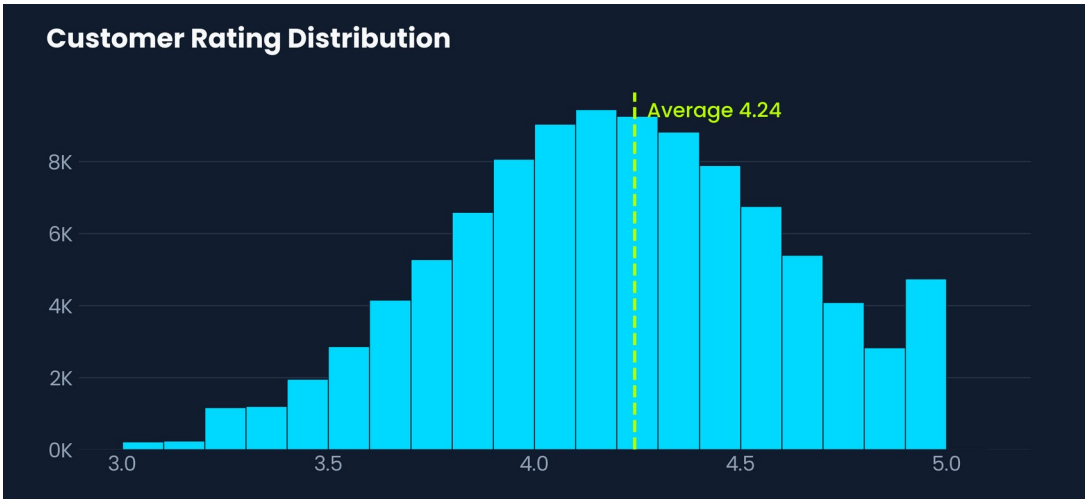

Observation: Most buyers charge at home, but a large group needs a dependable public network.

Improvement Opportunity:

- ❖ Add fast-charging points in the top 3 states and the top 10 cities.
- ❖ Bundle a home charger with every purchase to keep home charging convenient.
- ❖ Show nearby charger locations inside the owner app.

Customer Satisfaction

- The average rating is **4.24 / 5** with a median of **4.2**, and the lowest rating is 3.0.
- Ratings are nearly equal across all **18 cities (4.23 to 4.25)** and across all five models.
- **31.7%** of records score **4.5 or higher**.

Observation: Satisfaction is consistent everywhere, so no city or model is dragging the score down.

Improvement Opportunity:

- ❖ Study the 4.5+ group to learn what delights buyers and repeat it.
- ❖ Follow up with low raters (below 3.5) within a week of delivery.

Sustainability Impact (Estimates)

- The fleet avoids about **72,203 tonnes of CO2 per year**, saves about **53.3 million litres of petrol** and equals about **3.4 million trees**.
- **Bengaluru (8,085 t)**, **Ahmedabad (7,370 t)** and **Mumbai (7,230 t)** contribute the most.

Assumptions (from the dashboard code): 8,000 km per scooter per year, petrol scooter 0.051 kg CO2/km, grid 0.71 kg CO2/kWh, energy use equals battery kWh divided by certified range.

Improvement Opportunity:

- Publish these savings in marketing to support the clean-energy message.
- Offer owners a personal savings tracker in the app.

Key Insights and Recommendations

1. **Restart growth:** Sales are flat at about 20K units a quarter. Set a clear growth target and fund new markets and offers.
2. **Back the best sellers:** Rizta S and 450X deliver 55.3% of units and 53.8% of revenue, so protect their supply and promotions.
3. **Grow the premium 450 Apex:** It brings 10.8% of revenue from 8.0% of units, so target upgraders with better offers.
4. **Go beyond the top states:** Maharashtra, Gujarat and Karnataka hold 53.9% of units, while many cities stay under 3%.
5. **Fix charging access and keep quality high:** 42% of buyers use public charging. Expand charging while holding the 4.24 rating.
